Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claim 21 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. The claim 21 is a duplicate of claim 19, from which claim 21 depends.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

3. Claims 12, 13, 15-17, and 23 are rejected under 35 U.S.C. 102(b) as being anticipated by Schambre et al. (6,149,219).

Schambre et al. disclose a tailgate module (24) that has a depression (36) that can positively locate an item in both a first direction and a second direction, where the second direction is perpendicular to the first direction. A clamp (56) is provided to prohibit movement of the item in a direction perpendicular to the first and second directions. The clamp is naturally spring loaded. The depression is capable of locating a power saw. The bar (30) can act as a guide for stock material.

4. Claims 12, 14-17, 19, 21-23 are rejected under 35 U.S.C. 102(b) as being anticipated by Cupp et al. (5,169,202).

Cupp et al. disclose a tailgate module that is formed of several members (18,22). The members (18,22) define depressions (30) that can positively locate an item in a first and

second direction, where the second direction is perpendicular to the first direction. The members (18,22) can be made of high impact plastic. High impact plastic parts are commonly formed by injection molding. Several items are shown clamped to the tailgate in such a way that the clamp prevents movement in a direction perpendicular to the first and second directions. A power saw can be located in the depression (30). A stock guide (90) is shown in Figure 9.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 20 is rejected under 35 U.S.C. 103(a) as being unpatentable over Schambre et al. (6,149,219) in view of Cupp et al. (5,169,202).

Schambre et al. does not disclose the tailgate being molded.

Cupp et al. teach molding components of a tailgate.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to mold the unitary tailgate of Schambre et al., as taught by Cupp et al., to produce a tailgate that is resistant to rusting and denting.

Allowable Subject Matter

7. Claims 1-11 are allowed.

Art Unit: 3612

8. Claim 18 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
